

Ford Ranger Engines 23

The Ford Ranger is a range of pickup trucks manufactured and marketed by Ford in North and South America. The replacement for the Mazda-sourced Ford Courier, the Ranger was the first compact truck developed by Ford. Different engine ranges are used in various global markets. 2017 NAIAS – Ford presented the latest news and confirmed rumors, Ford Ranger will be available by 2019. After any rumors regarding the international version of the Ranger, it finally seems that the truck will be available in the US after not being available since 2012. ~read me please~ for up-front payment total on a remanufactured long block exchange engine, add the 3 figures at the right end of the table rows above. Mustang can be found with the Romeo or Windsor engine. The 1996-1998 and 2001-2004 Mustang GTs used Romeo engines. The 1999 and most 2000 Mustang GTs had Windsor engines. Fact that Ford's return to the hot midsize pickup market is trailing Chevy's—this time by a few years with the 2019 Ford Ranger—has a real sense of déjà vu about it. Bob Nagy
