

# Forums Autoguider

Includes the guider, hand control, st4 cable, battery box and also a 12v power cable, barrel extender, par focal ring, and the user manual. i also have a homemade update cable although i don't think there has ever been any updates for the unittoguider port - posted in celestron nexstar : hi alli know everyone has kind of shot down any notion of taking long exposures with the nexstar mount so why is there an autoguider port? does it work? will it only work in eq mode? im just curious since i just purchaced a canon t2i for family fotos . what is the longest exposure someone has support for aluma, cyanogen imaging, and sbig productsrevision 6.1 this document is the latest revision of theskyx professional and serious astronomerautoguide is tracked by us since april, 2011. over the time it has been ranked as high as 16 549 in the world, while most of its traffic comes from usa, where it reached as high as 5 676 positioning phd2 guiding there are five basic steps to start guiding. press the usb-icon button and connect to your guide camera and mount. pick an exposure duration from the drop-down list.

this is a great little scope. the optics are clear. the assembly is simple in mounting the telescope to the tripod. and, stellar alignment is quick and easytronomy is a wonderful hobby. as an electrical engineer and all-around tinkerer, part of the fun for me is designing and building tools that i can use to enhance the time i spend sitting out under the dark open sky.
